

Your KC Homes LLC Growth funding guide

A practical funding shortlist for Jared Tolley in Independence, Missouri.

The strongest starting point is a defined operating-business expansion. Prepare a washer-and-dryer growth budget and compare a participating MOBUCK\$ bank, AltCap, and an SBA microlender. Treat grants as a supplement to a plan that can work without winning one.

Profile used: You report more than two years in business, real estate as the main activity, and service to local stay-at-home moms through WD. Your website identifies WD as washer-and-dryer rentals with delivery and maintenance. This report assumes that is the business you mean. Business age, ownership, revenue and legal standing have not been independently verified.

Priority	Option	Best next step
1 · Prepare	UMKC SBDC + KCSourceLink	Get an eligibility review and lender-ready cash-flow plan. Contacts on page 4.
2 · Compare	MOBUCK\$ bank loan	Ask whether the small-business allocation still has funds and whether your mixed activities qualify.
2 · Compare	AltCap / SBA microloan	Price appliance inventory, tools and working capital. Confirm rental equipment is an eligible use.
3 · Small request	Kiva · typically \$1,000–\$15,000	Consider 0% community-funded debt if you can wait through fundraising.
4 · Grant supplement	NASE · up to \$4,000	Check membership eligibility and prepare a specific growth proposal.
Later / larger project	SBA 7(a), SBA 504	Explore eligible business expansion or premises used by the operating business.

Grant finding: I did not verify an open, unrestricted federal or Missouri grant that Your KC Homes LLC clearly qualifies for on the facts provided. SBA explicitly says it does not award grants to start or expand an ordinary business. Research, export and other restricted programs require a qualifying project. [SBA grant guidance](#).

The rankings are an assessment of fit, not a lender decision. Your requested amount, repayment capacity and the share of revenue from each activity remain unknown. The online report omits your EIN and street address; provide those directly in secure applications.

Three practical options to compare

Missouri MOBUCK\$ — ask your bank first

STATE INTEREST SUBSIDY · AVAILABILITY MUST BE CONFIRMED

This is a repayable bank loan with a state-supported rate reduction. The Treasurer announced a \$100 million small-business reopening on April 1, 2026, available until funds are depleted, and described rate reductions of approximately 2–3 percentage points. That announcement does **not** prove funds remain available today. [2026 opening announcement](#).

Published requirements include Missouri headquarters and operations, fewer than 100 full-time employees, for-profit status, no unpaid non-protested taxes and no unresolved state environmental compliance issues. Listed uses include equipment, inventory, operating expenses, facility repairs, and land/buildings. Your Missouri location is promising; the lender must assess the actual business and use. [Eligibility and uses](#).

The bank approves the loan under normal underwriting standards and submits the state application. New borrowers need a valid Missouri tax-clearance certificate. Ask for the dollar limit, term, fees, collateral, guarantee, rate-subsidy duration and rate after it expires. [Application process](#). Commerce Bank and Country Club Bank appear on the [participating lender list](#); begin with your existing bank if it participates.

AltCap — local community-development lender

REPAYABLE FINANCING · DIRECT INQUIRY AVAILABLE

AltCap's Missouri page advertises \$1,000–\$350,000, fixed rates priced from prime plus 4–6 percentage points, and terms up to five years. It lists 2–5% origination fees and a \$15 monthly servicing fee. These are published terms, not a quote; confirm the current product and all-in cost.

Its broad Missouri lending coverage makes this a useful conversation for appliance purchases, repair tools and growth working capital. Ask specifically whether it finances equipment rented to households and how it evaluates real-estate activities inside the same LLC. Contact **833-549-2890** or info@altcap.org. [AltCap Missouri terms, documents and application](#).

Kiva — small, interest-free crowdfunding loan

REPAYABLE FINANCING · APPLICATION AVAILABLE

Kiva advertises typical U.S. loans of \$1,000–\$15,000 with 0% interest, no fees, no collateral and no minimum credit score. You must recruit initial lenders from your network before public fundraising; approval and fundraising can take several weeks. Repayment generally starts one month after disbursement, with terms usually 12–36 months.

Potential fit: a small appliance batch with a measurable household-service story. Eligibility includes business-purpose and industry restrictions, a PayPal account and restrictions concerning current bankruptcy, foreclosure or liens. Debt refinancing and purchases of stock/equity are excluded. Ask Kiva to screen your mixed real-estate/appliance business before spending time on the profile. [Kiva application and full eligibility FAQ](#).

Match the money to the actual activity

SBA rules exclude passive landlord/developer businesses that do not actively use or occupy the financed assets, subject to a defined Eligible Passive Company exception. Speculative businesses are also excluded. A lender must review the complete structure and activities. [13 CFR 120.110](#).

Your funding purpose	How to approach it
Washer/dryer inventory, delivery, repairs and service	Ask for underwriting as an operating appliance-rental/service business. This is a potential fit, subject to the lender's equipment-leasing and mixed-activity rules.
Real-estate brokerage or management services	Describe the fee-generating work and exact expense. "Real estate" alone is insufficient to decide eligibility.
Buying homes to rent, hold or flip	Expect SBA eligibility restrictions. Ask banks about conventional investment-property or project financing; obtain written project-specific terms.
A shop or warehouse your operating business uses	Ask an SBA lender/CDC about occupancy requirements, project eligibility and owner contribution.

SBA microloan — a sensible small expansion inquiry

Up to **\$50,000** through nonprofit intermediary lenders. SBA lists working capital, inventory, supplies and equipment as permitted uses; real-estate purchases and existing-debt repayment are excluded. The maximum term is seven years, with rates generally 8–13%, set by the intermediary. Use SBA's directory to find a lender serving Jackson County and request a quote for the proposed WD purchases. [SBA microloans and intermediary directory](#).

SBA 7(a) — for a larger, supportable growth request

The program generally supports loans up to **\$5 million** for eligible operating businesses. Uses include working capital, equipment, qualifying debt refinancing and business real estate. You apply through a lender and must demonstrate creditworthiness and repayment capacity; the government guarantee protects the lender and does not erase your repayment obligation. Your two-plus-year history helps provide evidence, but does not establish approval or loan size. [SBA 7\(a\) overview and Lender Match](#).

SBA 504 — a later option for premises or major fixed assets

Explore this with a Certified Development Company if you need an operating facility or qualifying long-lived equipment. SBA describes 10-, 20- and 25-year maturities and requires at least ten years of remaining useful life for financed machinery/equipment. Working capital, inventory and investment rental real estate are excluded. Ordinary used household appliance stock is therefore a weak 504 starting point. [SBA 504 requirements](#).

Show lenders separate revenue, costs, assets and debts for WD and real estate. A new DBA or label alone does not change eligibility; ask whether the actual ownership and entity structure needs professional review.

Worth pursuing—and where to save time

NASE Growth Grant — up to \$4,000

PRIVATE COMPETITIVE GRANT · APPLICATIONS ACCEPTED YEAR-ROUND

NASE requires paid membership in good standing through award. Annual members can apply immediately; monthly members generally need 90 days. Its published schedule reviews July–September applications in October. If eligible, submit a completed application by the end of September for that review cycle; confirm submission details in the member portal.

Potential uses include marketing, part-time help, software and other specific growth needs. Debt and rent/mortgage payments are excluded. Submit a clear use-of-funds statement, business plan, recent tax return or profit-and-loss statement, and photo. A focused WD delivery/repair or customer-growth project is a reasonable proposal. Membership does not guarantee an award; compare dues with the benefits before joining. [NASE rules and application](#).

State and federal programs with narrower fits

- **Missouri Works:** hiring/investment incentives rather than an unrestricted grant. Statewide Works lists ten new jobs; Zone Works can start at two jobs plus \$100,000 investment in an eligible zone. Jackson County is excluded from Rural Works. Obtain state approval before project commitments covered by its timing rules. Lower priority unless you have a substantial hiring plan. [Requirements](#).
- **Missouri Veterans and Job Opportunity Grant:** the official page says applications are closed. It links awards to qualifying hiring and previously claimed federal WOTC. Do not budget an award or assume a future cycle will reopen. [Current status](#).
- **Missouri SSBCI / MTC IDEA Fund:** primarily technology-focused venture investment with co-investment, not a general small-business cash grant. A normal appliance-rental expansion is a weak fit. [MTC program](#).
- **USDA Rural Business Development Grants:** direct applicants are eligible public entities, tribes and nonprofits serving rural areas—not an ordinary for-profit LLC. [USDA eligibility](#).

Local people and services to use now

Resource / contact	Ask for
UMKC SBDC 816-235-6063	Confidential funding-readiness consultation; WD unit economics and mixed-business lender eligibility.
KCSourceLink 816-235-6500	A navigator, lender referrals and current competitions serving Independence/Jackson County.
Independence Chamber / IEDP 816-252-4745 · info@ichamber.biz	Address-specific local incentives and whether any current microenterprise/CDBG business assistance exists. None verified here.
Show-Me Network SSBCI assistance	Screening for accounting support from RubinBrown and legal help from SEED Law; confirm eligibility, capacity and any cost.

Build a budget around household service

Your service to stay-at-home moms can explain the value of reliable in-home laundry. Support that story with real customer counts, service records and results. Do not assume those customers meet income thresholds or that serving women makes the LLC women-owned.

SBA's women-owned contracting program requires at least 51% qualifying female ownership and control; it is a contracting certification, not an automatic grant. Other funders have their own rules. [SBA certification requirements](#).

Illustrative \$25,000 WD expansion budget

Planning example only. These are not supplier quotes, your actual costs, or a recommendation to borrow \$25,000.

Use	Example	Evidence to obtain
20 refurbished washer/dryer sets	\$16,000	Supplier quote at an assumed \$800 per set, condition and warranty.
Delivery and installation equipment	\$2,500	Dollies, straps, fittings and safety-equipment quotes.
Parts and service supplies	\$2,000	Repair history and initial stock list.
Customer acquisition	\$1,500	Documented campaign budget and expected customer cost.
Operating reserve	\$3,000	Cash-flow forecast; verify lender permits this use.
Total	\$25,000	Reduce or phase purchases if demand is unproven.

Check cash flow before choosing a loan

At a hypothetical 12% annual interest rate over 60 months, a \$25,000 amortizing loan costs about **\$556 per month** before fees. This is a calculation example, not a market quote. At an assumed \$35 monthly contribution per occupied set after direct costs, 16 occupied sets would cover only that payment. A planning cushion of 1.25 times the payment would require about 20 occupied sets; the lender may use a different standard.

At 80% occupancy, twenty purchased sets produce sixteen occupied sets. Under those assumptions, the expansion would leave almost no cushion for debt, and fixed overhead still must be paid. Use actual collected rent, maintenance, delivery, storage, insurance, idle time, losses and replacement needs; gross rental revenue is not available cash.

A useful request to take to a lender or adviser

“I’m Jared Tolley, owner of Your KC Homes LLC in Independence. We have operated for more than two years. Our activities include real estate and washer/dryer rental service for local households. I want to assess financing for [specific purchases] totaling [\$ amount]. I can provide financials by activity. Do these activities and uses qualify for your program, and what documents and repayment capacity would you require?”

This is an unsent discussion draft. Replace bracketed fields with verified details. Community impact can also support a proposal to a housing nonprofit to purchase appliance service for its clients; that would be a negotiated customer relationship, not a verified grant to your LLC.

Your next 30 days

1. **Days 1–3: define the request.** Choose the amount, purchases and timing. Split WD and real-estate revenue and costs. Document current sets, occupied sets, collected monthly revenue, repair costs and waiting customers.
2. **Days 3–7: get an eligibility screen.** Contact UMKC SBDC and your bank. Ask the bank about MOBUCK\$ allocation availability and repayment requirements. Ask AltCap about equipment rented to households and mixed-activity eligibility.
3. **Days 7–14: compare written terms.** Obtain two comparable offers or preliminary term sheets. Compare APR or equivalent all-in cost, origination and servicing fees, payment frequency, term, guarantees, collateral, prepayment costs and net cash received.
4. **By September 30, if eligible:** consider submitting a NASE proposal for the published October review cycle. Do not rush into membership solely because a grant is possible.
5. **Days 14–30: select a supportable first phase.** Confirm the payment works with conservative occupancy and repair assumptions. If it does not, reduce the first purchase or improve the operating economics before adding debt.

Documents to assemble

- LLC formation and operating agreement; current ownership details and any DBAs.
- EIN confirmation letter and required licenses/insurance.
- Two years of business and personal tax returns, with schedules.
- Year-to-date profit and loss, balance sheet and business debt schedule.
- Recent business bank statements; lender-requested history.
- Cash-flow forecast using actual WD occupancy and costs.
- Asset list, equipment liens and purchase quotes.
- Missouri tax clearance for MOBUCK\$; lender-requested personal financial statement.

This combines a practical preparation checklist with AltCap's [published document list](#) and the [MOBUCK\\$ application requirements](#). Each lender sets its final list.

Information that would sharpen the recommendation

Funding amount and deadline; last full-year revenue and net profit; current monthly debt payments; approximate personal credit range; employee count; ownership percentages; WD's share of revenue; and whether real-estate income is from commissions, management, long-term rentals or flips. No credit report or financial account was accessed for this research.

Keep the search geographically accurate

Independence is a separate city from Kansas City, Missouri. A "KC" program may have city-limit, neighborhood, industry or ownership requirements. Ask IEDP to screen the supplied business address against actual program boundaries; no grant-zone or low-income qualification was inferred from the ZIP code. The city's [incentive page](#) offers a starting point, and [KCSOURCELINK's funding list](#) is a watchlist, not proof of eligibility.

Method: official agency, program-operator and local business-support sources checked September 12, 2026; links appear beside the relevant claims. "Application available" describes the published intake route, not guaranteed funding. No applications, memberships, credit inquiries or external messages were submitted.
